

# PORTWARE ENTERPRISE

ALGORITHMIC EXECUTION MANAGEMENT SOLUTION

Portware's flagship product is a comprehensive, fully customizable, multi-asset trade management system for the execution and creation of automated trading strategies.

## Because You Are

A hedge fund, buy-side or sell-side institution who recognizes the need for an industry-leading trade management system that can drive efficiencies, increase alpha and rapidly respond to changes in the global market environment.

### FLEXIBLE

Fully customizable platform that seamlessly integrates with any proprietary or third party trade workflow component.

### CUSTOMIZABLE

A complete solution that can be configured to handle any type of trading style or strategy.

### BROKER NEUTRAL

Portware Enterprise can connect to over 300 global market destinations, including brokers, algorithmic strategies, ECNs, ATS's and Crossing Networks.

## Because You Need

### OPEN ARCHITECTURE

A rich, event-driven API built upon best-in-class technology to automate workflow, implement trade models and manage real-time TCA.

### MULTI-ASSET TRADING

The ability to trade global equities, options, futures and FX using a centralized platform.

### SCALABILITY/PERFORMANCE

The tools, resources and technology to evolve with your business and keep up with today's high-capacity, high-frequency trading environment.

### TRADE AUTOMATION

Drive efficiencies and increase alpha by deploying a comprehensive trade management system that can be integrated with your existing infrastructure.
