

PORTWARE FX

HIGH PERFORMANCE FOREIGN EXCHANGE TRADING

Portware FX is a comprehensive, highly customizable foreign exchange trading platform that gives traders unparalleled control over their FX order flow.

Because You Are

An Institutional Asset Manager, Hedge Fund or Sell-side Firm that wants to achieve new levels of performance in global currencies by leveraging advanced liquidity aggregation, best in class trading technology and a flexible trade architecture that easily adapts to your specific requirements.

ACCESS

Connect seamlessly to all global liquidity providers, including dealers, ECNs and interdealer platforms.

CUSTOMIZE

Deploy a highly integrated solution that addresses all of your trading and workflow requirements.

TRADE

Execute spot, forwards, swaps, RFQ/RFS and leverage integrated algorithmic strategies from Portware and leading FX dealers.

Because You Need

COMPREHENSIVE INTEGRATION

Seamless connections to all OMS's and post-trade systems eliminates operational risk. Full support for compliance rules, restricted broker lists, netting and aggregation.

ANALYTICS & TCA

Quantify your trading performance via FX Liquidity Monitor (FXLM), Portware's advanced FX reporting and analytics package.

OPTIMAL PRICING

Client-side aggregation and direct dealer connections minimize latency and allow clients to leverage their credit profiles and relationships for improved execution quality.

MULTI-ASSET TRADING

Create advanced cross-asset trading and auto-hedging strategies to maximize alpha capture and increase trading efficiencies.
